

**The XXIth International Conference on Electrical Machines
ICEM 2014**
September 2-5, 2014
Berlin - Germany

Special Session on

ELECTRICAL MACHINES FOR EXTREME ENVIRONMENTS

organized and co-chaired by:
Antonios Kladas, kladasel@central.ntua.gr
Chris Gerada, chris.gerada@nottingham.ac.uk

Call for Papers

Topics of interest include, but are not limited to:

- Electrical machines operating in high temperature environmental conditions.
- Ultra high speed electrical machines.
- Operation in challenging environment including down-hole, aerospace, em-launch and sub-sea.
- Fault tolerant machines for safety critical applications.
- Advanced magnetic, insulation, conductive and structural materials for extreme - machines.
- Novel electrical machine topologies for short-duty and pulsed loading.
- Fault diagnosis and usage monitoring techniques for electrical machines operating under extreme operating conditions.
- Very large machines.
- Viability considerations for electrical machine operating in challenging new application areas.

Provisional full paper submission deadline: 23 February 2014

(The deadline is the same as for regular papers – check the website for changes)

All the instructions for paper submission are included in the conference website:
<http://www.icem2014.de>
