

**The XXI<sup>th</sup> International Conference on Electrical Machines  
ICEM 2014**  
September 2-5, 2014  
**Berlin - Germany**

**Special Session on**

**THE ELECTRIC PLATFORM AS A MEANS FOR GREEN SHIPPING**

organized and co-chaired by:  
**John Prousalidis** [jprousal@naval.ntua.gr](mailto:jprousal@naval.ntua.gr)  
**Chris Hodge**, [CHodge@bmtdsl.co.uk](mailto:CHodge@bmtdsl.co.uk)

...

**Call for Papers**

Topics of interest include, but are not limited to:

- Power quality of electric propulsion applications (e.g. pods, thrusters)
- Efficient electric power generators (e.g. shaft generators, MVDC generators)
- Renewable energy sources onboard (e.g. PV's, Fuel Cells, kites)
- Electric energy saving devices for green shipping (e.g. power converters, soft starters, super-capacitors, batteries)
- Ship electric energy systems vs ship efficiency
- Ship to shore interconnection (cold ironing) and smart grids
- Electric power, management and control system (EPMACS) and ship energy efficient management plan (SEEMP).

**Provisional full paper submission deadline: 23 February 2014**

(The deadline is the same as for regular papers – check the website for changes)

All the instructions for paper submission are included in the conference website:
