Power Supply Quality and Efficiency

Conference Scope and Objectives

telescon[®]2009 the 4th International Telecommunication Energy Special Conference is an international forum, where experts appreciate the exchange of information on the state-of-the-art of telecommunications power supply systems. State-of-the-art lectures on installation, modernisation and operation of power supply systems for telecommunications networks will be held.

The specific conditions of the fast growing telecommunication networks in the world will be taken into account. The presentations given in the conference, or the products and components exhibited in the exhibition area will demonstrate the expertise and know-how in telecom power supply systems including latest developments.

International experts will participate and contribute with lectures and presentations about new strategies, developments, system design and operational problems including their technical solutions. Main emphasis of this conference will be put on the power quality of the mains' connections for a high reliability and availability of the fast increasing wire- and wireless information communication. Paper will be presented via plenary sessions, oral presentations and discussion forums.

Main topics of the conference are:

- AC/DC Power Supplies
- UPS and Converters
- EMC and Product Safety in Telecommunication Equipment
- Batteries and other Energy Storage Systems
- Powering Fiber in The Loop
- Conversion Technology and Design of Power Supplies
- Alternative Power Sources for Telecom Networks
- Thermal Management of Indoor or Outdoor Installation
- Operation and Maintenance

Exhibition

An exhibition featuring power equipment and related products will complement the technical sessions and will be organised at the Conference Site.

Venue

The Golden Tulip Vienna All Suites Modul is located in the middle of Döbling, one of the most exclusive residential areas in Vienna. The hotel offers 3 floors with totally 1.200 m² arrangement surfaces and adaptable room layout for 25 to 600 persons. All rooms are equipped with up-to-date conference and communication technology. The hotel is directly accessible within 20 minutes from Vienna's city center by bus.

Vienna

Vienna is a geographic and cultural hub in Europe. It represents the ideal link between history and tradition on the one hand and modern intellectual curiosity and forward orientation in science and art on the other. Vienna provides an unrivalled setting for international conferences, thanks to its role as third UN city and its extensive experience in congresses and meetings. Great Habsburg traditions in music and art as well as thriving alternative culture guarantee recreation and stimulation at leisure time.

Management Committee

General Chair

Franz Geiger, Member of the Board at Siemens AG Österreich, Vice-president of the OVE

Technical Programme Chairs

Rudolf Mörk-Mörkenstein, officially authorised consultant, generally sworn and court certified expert

Wilfried Schulz, T-Systems Enterprise Services GmbH

Liaisons

Günter Vau, Consultant

Richard Valenta, OVE - Managing Director GIT

Finance

Volker Schanz, VDE - Managing Director ITG

Local Arrangements and Exhibition

Peter Neu, VDE Conference Services

Richard Valenta, OVE
